FOR PET LOSS PROFESSIONALS

Something gentle families can keep

A short memorial video made from one photo of a pet who has died: the dog or cat walks toward a rainbow bridge, looks back once and walks on into the light, ending with the pet's name, years and a few words from the family.

Samples show fictional, AI-generated pets — never a customer's pet.

How it works for a family

1. Upload one clear photo of just the pet at rainbowbridgevideos.com. The photo is checked before paying.
2. Add the pet's name, years and a short farewell line, and choose one of 5 gentle scenes.
3. Pay $9.99 once, no account. The video arrives by email, usually within about 10 minutes; the card is charged only once it is ready.

When it may help

- After the goodbye, not during it — a mention in a follow-up message or care packet lets the family choose.
- For a memorial gathering, or to send to relatives far away.
- When the family has only one or two good photos.
- Not for every family: it is one option among many.

Our promises to grieving families

Quiet, plain words — no countdowns or upsells. Photos are deleted after 7 days and never used to train AI. If a video isn't right, we remake it from another photo, and refund in full if it still isn't. A person answers every email.

We don't pay commissions. We can give the families you support a personal code for 15% off — write to support@rainbowbridgevideos.com with your name and practice.
